Education

HUTECH - Ho Chi Minh City University of Technology (2020 - 2024)

Major: Information Technology

Relevant coursework: Web Development, Database Management, Object-Oriented Programming.

Projects

Project: Book Management Application

Source: https://github.com/LuongVanHieu-2001/BookStore.git

- The web helper application manages functional CRUD lists (Create, Read, Update, Delete), assigns administrator and user permissions, supports uploading and displaying photo lists.
- Backend: Spring Boot (Spring MVC, Spring Security, Hibernate, JPA).
- Frontend: Thymeleaf, Bootstrap 5.
- Database: My_SQL(Laragon).
- Decentralization: Spring Security (Admin, User).

Project: E-commerce Product Management

Source: https://github.com/vanhieuu12/e-commerce_php.git

- The Product Management System project is developed in static PHP, providing product and category management functions as well as user authorization. The system supports Administrators (manage products, categories, users) and Users (view, buy products) without using a framework.
- Backend: Pure PHP, handles product management logic, categories, user authentication and authorization.
- Frontend: HTML, CSS, JavaScript, Bootstrap, displays a friendly and responsive user interface.
